

# PGV-131-B76-6/4PP

2/2-cestný pneumaticky riadený ventil | séria PGV | EPDM

## Properties

|                       |                                                       |
|-----------------------|-------------------------------------------------------|
| Prípoj                | G 1.1/2"                                              |
| Pracovné médium       | Stlačený vzduch, voda, olej                           |
| Teplotný rozsah       | 0...+130°C                                            |
| Pracovný tlak         | 0,2...16 bar                                          |
| Menovitý priemer      | DN 40                                                 |
| Riadiaci prípoj       | G 1/8"                                                |
| Riadiaci tlak         | Zhodný, alebo vyšší od pracovného tlaku (max. 16 bar) |
| Kv hodnota   voda     | 29,5 m3/hod                                           |
| Funkcia               | 2/2-cestný                                            |
| Materiál tela ventilu | Med'                                                  |
| Riadenie/ovládanie    | Pneumaticky riadené                                   |
